SimpleSignal Anywhere

A powerful business communications solution for a virtual workforce

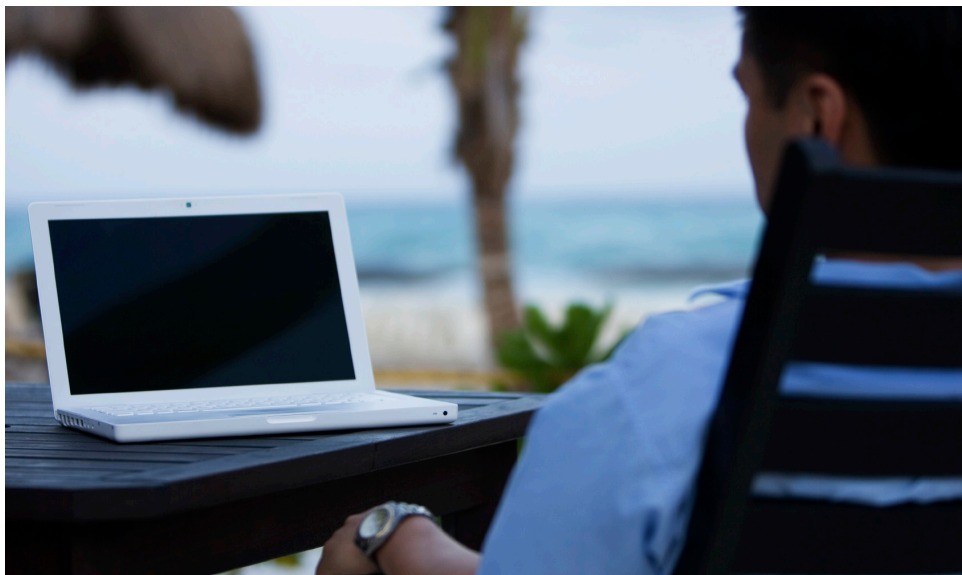

Mobile Productivity Just Took a Quantum Leap Forward!

Introducing SimpleSignal Anywheresm, our powerful Unified Communication solution that allows business people to make and receive calls from any location, at any time, on any device. They can use mobile phones, fixed phones, or soft phones with only one number, one dial plan, and one voice mailbox plus a unified set of features across all devices—No IP Phone Required! Further, SimpleSignal allows users to seamlessly “swap” calls between devices – if you need to leave your office at 6pm, just move the call from your desk phone to your mobile phone without the person you’re talking to noticing.

Breakthrough in VoIP Technology

SimpleSignal Anywhere is not simply call forwarding, find-me, follow-me, or simultaneous ring. It is quite possibly the biggest breakthrough in IP telephony as it relates to simplifying communications and enabling today’s mobile, virtual workforce. This is a “Killer App” for niche businesses where mobility is critical. Real Estate Agents, Field Salespeople, Executives, and Rock Stars will find real value in the freedom that comes with simplifying and unifying their communication.

Productivity Anywhere... Any Phone

Unchain Yourself From Your Desk

- Make any 10-digit number on any device your "office phone".
No IP Phone Required—This is a major technology breakthrough!
- Work anywhere and never lose the convenience of being "in the office"
- Bring advanced IP calling features to any computer or any phone
- Dial 4 digit extensions to reach co-workers as if you were in the same office
- Remain in Hunt Groups, Call Centers, and Conferences even when you are mobile
- Make calls from any device, landline, cell, or softphone, and the caller ID says you're calling from your office phone

Never Miss Another Call...Unless You Want To

- One number rings all your phones
- Calls to that one number ring all your devices simultaneously so you can answer from whichever is most convenient

Move Calls Between Devices

- With Call Swap, if you answer the call on your cell phone you can "swap the call" to your desk phone when you re-enter your office saving cell minutes and often improving call quality in buildings where cell reception is marginal
- Conversely, if you are on your desk phone and need to leave the office, just "swap the call" to your cell phone at the touch of a soft key

Control Your Callers

- You control how and when you are reachable
- Tag calls from your mobile as business or personal calls
- Select certain calls to come through to you directly while all others are diverted

Save Money on Cell Phone Charges

- International callers can save hundreds of dollars in cell phone international calling charges
- Touch a pre-set key on your cell phone and access the SimpleSignal network where international calls cost pennies instead of dollars

The Power of Simplicity...The Simplicity of One
Welcome to Unified Communications by SimpleSignal
