

Hello <first name>,

Here is your Simple Signal agent support email to help you better understand our product.

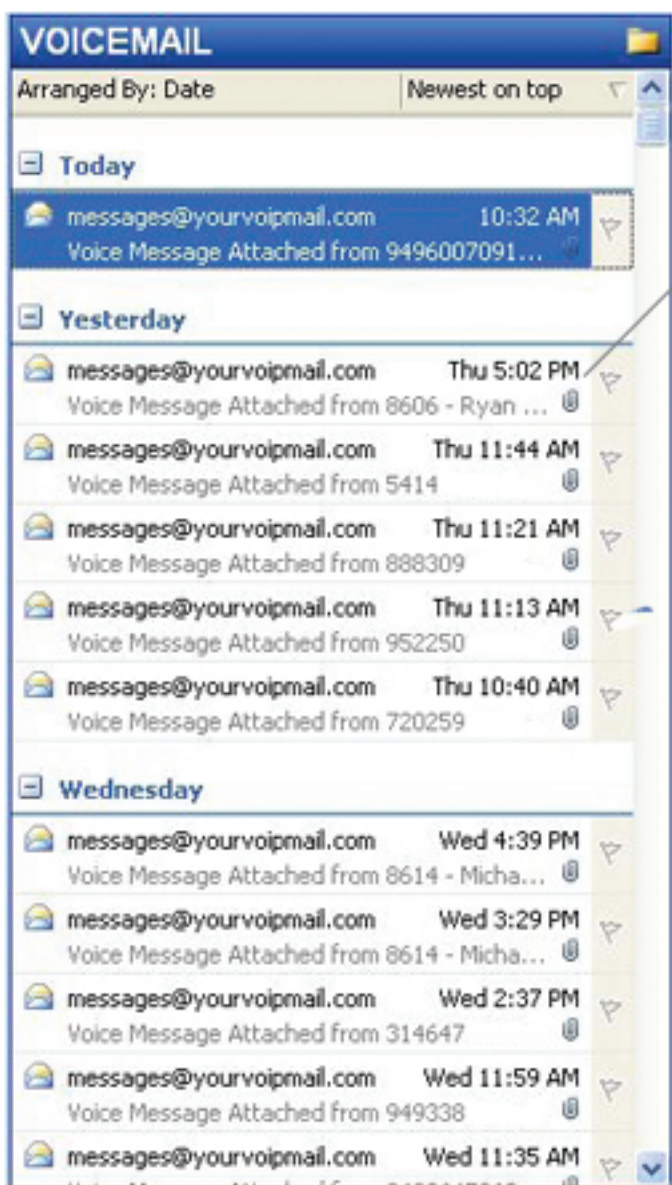

FOCUS ON FEATURES

[Support and Downloads](#) | [Contact Us](#)

Visual Voicemail

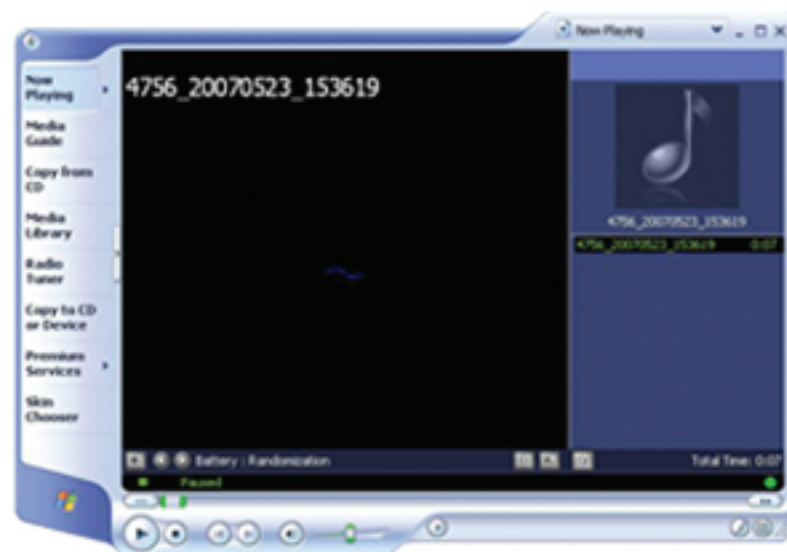

This feature gives you the ability to select only the messages that you want to hear. Visual Voicemail enables you to manage your messages on your desktop by viewing who called and left the message, the caller's telephone number, and the date and time of the call. With the audio .wav file message in your in-box you can play, pause, replay, save, delete or even forward via email. Visual Voicemail allows you to listen to the message you want to hear without having to listen to your prior messages. This feature makes listening to your messages hassle free.
