"We endeavor to be the industry's single most knowledgeable resource of emerging communications technologies."  
– Dave Gilbert, CEO, SimpleSignal

**About Us**

**Overview**  
SimpleSignal is a service provider of a disruptive technology that is radically changing the way the world communicates and is altering the current business models of the largest telecommunication companies on earth. This chaos of change amidst the giants will create an opportunity for SimpleSignal to bring our solution of converged voice, video and data over broadband to small to medium business (SMB). There is a dramatic transformation in telecommu... commu... dista...

**Simultaneous Ring**  
One number rings all your phones.

**SimpleSignal** We make Business VoIP simple.

SimpleSignal was a great move for Match.com. My team loves the efficiency they get with the advanced features."  
– Michelle Watson, Match.com

CUSTOMIZED BRANDING

INFINITE SCALABILITY

FAST DEPLOYMENT

WEB-BASED PROVISIONING

"LAYERED ON" FEATURES

DRAMATIC EFFECT

## Why a web call button?

The Internet is an impersonal place. Communication on the web takes place by text, not usually by voice. Creating a personal way to connect to your sales staff has been proven to significantly increase your conversion rate.

## How it works

Place the button on websites, email, Internet ads. When a caller enters your website they can instantly make a call by pressing the web call button. They will enter a number where they want to be reached and the call will be automatically initiated.

## Benefits:

- Instant calling to your sales staff, technical support or call center
- Route calls to any phone
- Increases conversion rates
- Customizable web call button
- Easy set-up
