

READ YOUR VOICEMAIL

VOICE TO TEXT

INTEGRATES W/ ANY PROVIDER

Just read your voicemails on your cell phone or in email. Your mobile, home and work voicemails are sent to you as text messages. Now you can understand the message with just a glance.

- **Instantly read your voicemail**
- **Scan for important details in seconds**
- **Decide which contacts get transcribed**
- **Search voicemail easily**

You'll also receive your voicemail in email as an MP3 attachment. Plus, you can still call into your voicemail to hear the message.

Benefits of Voice2Text

No Changes Required

Voice2Text is the only service which effortlessly integrates with all major mobile and landline networks to access & retrieve your voicemail - without requiring either you or the phone networks to change a thing. There are no hidden call forwarding fees, you don't need a new number and there is no software to install. Your voicemail stays on your existing phone's voicemail system so you can access it the way you always have, if you choose. Or you can listen to your voicemail direct from your email, or access them from Voice2Text.

Visual Voicemail for your Cell, Home & Work phones

Do you get too many voicemails and need a way to play the most important message first? Need instant access to new voicemail from the road or abroad, or because you have poor cell phone reception? Want to save your important voicemails forever, or easily forward MP3s of your voicemail to others? Voice2Text delivers. Your new voice messages are automatically sent straight to your email inbox. Or you can instantly check for and listen to new phone messages, play all of your old messages, delete old messages off your phone and manage all of your cell, home & work voicemail - direct from your inbox.
