

ONE NUMBER
IN THE OFFICE
ON THE ROAD
IN THE HOTEL
IN THE HOME

Experience the Freedom of Complete Mobility!

Work is a network, not a place!

Business Communication Just Took a Quantum Leap in Simplicity!

Introducing SimpleSignal Mobile PBX, our powerful Unified Communication solution that allows business people to make and receive calls from any location, at any time, on any device. Now you can integrate your mobile phones, fixed phones, or soft phones with one number, one dial plan, and one voice mailbox plus a unified set of features across all devices – No IP desk phone required! Further, SimpleSignal Mobile PBX allows users to seamlessly “swap” calls between devices – if you need to leave your office at 6 PM, just move the call from your desk phone to your mobile phone and the person you’re talking to doesn’t notice the swap. And SimpleSignal SMS now allows you to receive texts through your office number. You truly never have to give out your mobile or home phone number again!

Breakthrough in Untethered IP Communications

SimpleSignal Mobile PBX is not simply call forwarding, find-me, follow-me, or simultaneous ring. It is quite possibly the biggest breakthrough in IP telephony as it relates to simplifying communications and enabling today’s mobile, virtual workforce. This is a “Killer App” for the way businesses are being built in today’s economy. No longer is business about a specific location. Companies are now being built virtually with no limitations on geographic location. So why limit your people with restrictive desk phone communications? SimpleSignal has invested millions of dollars perfecting this awesome mobile UC solution so we can deliver the freedom that comes from simplifying, unifying (and mobile powering) all the ways your business communicates and collaborates.

Productivity Anywhere... Any Device

simplesignal™
MobilePBX

Unchain Yourself From Your Desk

- Make any 10-digit number on any device (including iPads and Android tablets your "office phone." **No IP Phone Required—This is a major technology breakthrough!**
- Bring your own device (BYOD) H.323 & SIP compatible
- Use instant messaging (IM) & presence on your mobile device
- Work anywhere and never lose the convenience of being "in the office"
- Bring advanced IP calling features to any computer or any phone or mobile device
- 4-digit dialing between extensions
- Remain in Hunt Groups, Call Centers, and Conferences even when you are mobile
- Make calls from any device, landline, cell, or softphone, and the caller ID says you're calling from your office phone

Never Miss Another Call...Unless You Want To

- One number rings all your phones (or other devices)
- Calls to that one number ring all your devices simultaneously so you can answer from whichever is most convenient

SimpleSignal SMS

Now receive texts through your office number!

Combine SimpleSignal's Mobile PBX with SimpleSignal's SMS Text Messaging for the ultimate one number solution. Now use your smartphone or tablet to send and receive SMS using our easy to download application. Any messages sent to your work or home phone number will be delivered to the app on your mobile device. Likewise, messages that you send to co-workers and customers appear to come from your office or home phone number.

Move Calls Between Devices

- With Call Swap, if you answer the call on your cell phone you can "swap the call" to your desk phone when you re-enter your office saving cell minutes and often improving call quality in buildings where cell reception is marginal
- Conversely, if you are on your desk phone and need to leave the office, just "swap the call" to your cell phone at the touch of a soft key

Control Your Callers

- You control how and when you are reachable
- Tag calls from your mobile as business or personal calls
- Select certain calls to come through to you directly while all others are diverted to voicemail or a team member

Save Money on Cell Phone Charges

- International callers can save hundreds of dollars in cell phone international calling charges
- Touch a pre-set key on your cell phone and access the SimpleSignal network where international calls cost pennies instead of dollars
